

## KLM Digital wins service award

Yak Manicou, Phil Myatt and Kyocera Technical Service Manager Dave Hill

Phil Myatt, Senior Engineer at KLM Digital, has won the first Kyocera Service Trophy competition. He reached

the final of the competition after scoring among the top nine entrants to Kyocera's online technical question-

naire, in which all engineers from Kyocera's servicing dealers across the country were invited to take part. These nine were then invited to the Grand Final.

Engineers were tested on their knowledge of Kyocera hardware, software and applications, specifications and configurations, and mechanical and electrical regulations. They also had to complete practical challenges to build a working Kyo-buggy, and re-assemble a fuser unit from a bag of parts.
